## PROJECTS

### WANDERINWORDS.COM | Outdoors website

- Created a responsive website dedicated to exploring public lands.
- Built site from scratch using HTML, CSS, JavaScript and jQuery.
- Shot, edited and integrated photos and videos to accompany writings.

### EXPLORE FOUR | Web application

- Developed an application that allows users to locate and learn about National Park Service locations within the Four Corners region.
- Constructed the app with React, JavaScript, JSX and CSS.
- Utilized Google Maps and National Park Service Data APIs to render park locations, photos and information.
